Behavior Process	Means Structure	End Function	Reading in Section 1
Passive tools	No choice; one structure in all environments	No choice; one function in all environments	
Reactive state-maintaining	No choice; variable but determined	No choice; one function in all different environments	
Responsive goal-seeking	Choice of means; variable and chosen	No choice of ends; variable but determined	The agents of ARC-AGI-3, ours included. Each game's rules fix the end, its win condition; the score charges the means, actions per level against a human reference. Across games, at most multi-goal-seeking: the game, not the agent, sets which goal (Ackoff & Emery).
Active purposeful	Choice of means; variable and chosen	Choice of ends; variable and chosen	The working definition of a general intelligence adopted here: a purposeful system that selects its goals as well as its means. Not tested.

Left three columns: Gharajedaghi (2011, p. 36, Table 2.1), after Ackoff.
